People + Technology Building Value

When you're looking for a partner that can design and deploy high-value systems and services to meet the complex requirements of your business, call on Sentia. We provide expert, battle-tested advisory services and cutting-edge technology solutions to leading companies in Canada and worldwide.

Value beyond products

At Sentia, our approach is comprehensive and consultative. Your unique business goals are our first priority. We consider ourselves an extension of your team, always striving to look at challenges and opportunities from your perspective.

Our philosophy also means that – along with offering highest-quality products from leading vendors – we keep an independent eye out for game-changing trends and cutting-edge, emerging technologies. Each Sentia solution is built for long-term value balanced with sensitivity to today's budget.

Adding value through flexibility

Customers depend on us for a wide range of ongoing managed services and hosted solutions. Whether you require a deployment on your premises or hosted in the Sentia cloud, we're there when and where you need us.

We've built our business by fulfilling IT needs in new ways that go beyond traditional IT procurement and management approaches. And we can offer added value by freeing your personnel to concentrate on the core projects that are key to your business.

More than face value

People are pivotal to any partnership. Sentia's team of senior architects lives and breathes IT, contributing superior skills as well as a proven track record of results. And our entire staff exhibits a proactive and positive attitude. We share a deep dedication to our work and pride in our customers' successes.

A Company Built on Value

In 2008, we formed Sentia based on a passion to better serve customers in a world where technology is evolving more rapidly than ever before.

We envisioned an innovative and agile organization, powered by expert IT professionals, designing advanced intelligent infrastructure solutions. A managed services company with an unwavering focus on value – that would deliver outstanding results for our clients while developing trusted, long-term relationships.

Today, we're still driven by this mission.

Advisory and Assessment

Expert guidance makes traveling from where you are to where you want to be faster and more efficient. Our assessment and advisory engagements provide value through our extensive experience, personalized service and affordability. When can help chart your course for network optimization, server/storage consolidation, cloud/VDI readiness, backup and recovery and more.

Implementation and Integration

Our boutique approach means you get the services you need – no more and no less. Whether turnkey or custom-deployed, your solution is planned, integrated and implemented to fit seamlessly with your goals and project timelines.

Enterprise Infrastructure

If data center, server, storage and virtualization technology convergence has your IT department searching for straightforward solutions, we can assist. Our experts develop customized, integrated approaches that simplify complexity without compromising security and performance.

Enterprise Cloud

When developing your cloud strategy, you need a partner with their feet on the ground. Our advanced solutions include remote backup, hosted virtual servers, desktops and storage, hosting and a wide variety of options for business continuity, operational efficiency, security and compliance.

Business Continuity

Disruption. It's not if, it's when. Be prepared with our cost-effective and efficient portfolio of disaster recovery services. We can design a customized solution for rapid response and continuous operations in advance of the inevitable outage.

Data Protection

Safeguard the security and availability of your vital IT assets. Our services offer lower TCO and scale as your business grows – so you get the best possible value plus peace of mind. Whether on-premise or in our Tier 3 data center, the integrity and reliability of your data is ensured.

Management and Support

Does your business require support services, available 24/7/365? From 100% remote infrastructure management to remote monitoring to on-premise and basic SLAs that complement your in-house staff, our offerings flex with your IT needs and budget to help protect and maintain your valuable IT assets.
