

Support

Time Is Running Out...

As you may or may not be aware, September 19th 2018 marks the end of support for VMware version 5.5. If you are still running V5, it is time to start considering your path ahead before it is too late. We'd like to help...

With Sentia's team of VMware certified technical specialists, we can assist in assessing, planning, designing & migrating your virtualized environment to a more current & supported version of VMware.

We have performed dozens upon dozens of upgrades and migrations and our results are guaranteed.

Experience & Affordability

At Sentia, our approach is comprehensive and consultative. Our technical team are comprised of senior, deeply skilled professionals with years of experience and references under their belts. Our Trusted Adviser approach ensures you are satisfied with our work and the results of your project.

Adding value through flexibility

We take a unique customer focused approach to delivering value and we pride ourselves upon being able to be flexible to your requirements. No two client environments are the same and each requires careful planning and execution to ensure success.

More than face value

People are pivotal to any partnership. Sentia's team of senior architects lives and breathes IT, contributing superior skills as well as a proven track record of results. Our entire staff exhibits a proactive and positive attitude. We share a deep dedication to our work and pride in our customers' success.

Sentia's Areas of VMware Subject Matter Expertise:

Assessment & Advisory:

- Virtualization Optimization
- Virtual SAN
- VMware Capacity Planning
- Virtual Desktop Infrastructure

Implementation & Integration:

- Installations
- Upgrades
- Migrations (eg. V5 to V6)

For further detail on our VMware capabilities see reverse side...

Adding Value Through Experience

Sentia have worked with VMware and other virtualization technologies to develop a broad range of expertise that might be of interest to you. Below we provide a short list of real life examples, where our x86 & Virtualization practise have been able to help clients get the most from their investment in virtualization technology.

Assess

- VMware Virtualization Optimization Assessment (VOA)
- VMware Desktop Infrastructure Assessment
- VMware Capacity Planner
- Virtual SAN Assessment

Design

- Virtual Desktop infrastructure
- VSAN sizing

Implement

- Basic installation & configuration of VMware
- Version upgrades & VM migrations
- VSAN & VDI implementations

Integrate

- Veeam, Spectrum Protect, Microsoft & Other software integration with VMware

Manage & Support

- On-going monthly monitoring & support of existing virtualized environments
- Ad-Hoc VMware support

Sentia Recommends VMware vSphere Optimization Assessments

A Sentia delivered VOA is an easy, yet valuable, health check of your virtual environment. The assessment is free of charge and it provides you with a comprehensive analysis and report of your virtual environment. It identifies areas to optimize capacity, minimize risk and improve the overall health of your virtual systems.

The process is easy & the results are powerful:

- Step 1 – Install vRealize
- Step 2 – Collect Data with vRealize (~5-30 days)
- Step 3 - Receive & review with Sentia your complimentary report
- Step 4 - Identify areas you wish to improve upon, prioritize & take action

Assess | Design | Deploy | Manage
