IBM Spectrum Storage Suite

Sentia's Spectrum Software Services

Advice, Expertise & Support You Can Count On

For over 10 years, Sentia have invested to become Canada's top IBM Spectrum software services & solution provider. To date, we have delivered in excess of 150 successful Spectrum software IT projects on time and on budget.

Expertise & reliability are two pillars of our corporate value system. We are proud of our ability to offer clients the Spectrum software services and support we offer today.

Our Spectrum team is deeply skilled across the Spectrum Suite including Spectrum Control, Protect, Protect +, Archive, Virtualize, Accelerate and Scale. We have the ability to assess, design, implement & manage the Spectrum suite of software and help you protect your data cost effectively.

Sentia is a professional, flexible & highly skilled team of experts with the ability to customize our services to suite your unique data protection needs and budget.

From implementations, upgrades & assessments to short or longer term support services agreements, we offer you choice.

Our clients have trusted us for over a decade to support their Spectrum software needs in a variety of ways. From initial implementations or upgrades to providing long or short term support services while their in-house resource(s) enjoy well deserved vacation time or focus on other areas of the business.

We are flexible, skilled & interested in discussing how we might be able to assist you.

Where and How Can Sentia Assist?

A number of ways exist to leverage our IBM Spectrum Software subject matter expertise. Below we identify and describe a list of real life scenarios where our Professional Services team were able to add value and deliver valuable service for our customers in a responsive, timely manner.

Architecture & Design

Customers interested in looking for ways to improve how they manage their backups have leveraged our SP technical team to aid in the re-architecture and/or re-design of new and improved backup environments.

Implementations & Version Upgrades

Clients new to Spectrum Protect & other Spectrum software products have experienced accelerated implementation & quicker time to value. Existing SP clients have enjoyed version upgrades performed in a secure, efficient manner.

Health Checks & Reviews

Existing SP clients have asked Sentia to help ensure their backup environment(s) are maintained and reviewed on a quarterly or semi-annual basis. Our team provides a thorough review of the SP environment and offers recommendations to improve including new features & functions available from IBM.

Administration & Support

Sentia currently manage several SP environments and act as the primary backup administrators freeing up their IT resources to focus on other IT priorities.
