

## Sentia's Managed Cloud Backup

### Intelligent – Secure – Flexible

Perhaps the most important asset to any business is its data. Data is everywhere. Data is growing. Protecting it is everything.

From virtual cloud data to physical endpoint files and everything in between, the ability to store, secure and recover data is critical in today's day and age. Our cloud backup solution offers you total data protection. Our solution enables your business to be resilient, secure and quickly restore at any time.

Let's face it, backup and recovery can be a challenge to manage and master. While important, it is often overlooked until there is a problem.

With our solution, our backup experts take care of everything including implementation, configuration, management & reporting.

Our solution includes unlimited cloud storage, built-in Ransomware protection & rapid restores. Our Managed Cloud Backup solution is flexible, efficient and affordable.

## Customized for your needs

Sentia's team of backup experts will assess and customize our solution to suit your businesses unique requirements and we will install, configure and deploy our solution through our SmoothStart process.
