

Sentia's Secure Managed Network All-in-one Security, Flexibility and Insight

Managing, securing, monitoring and supporting your own network, client devices and access points can be a drain on your time, human and financial resources. Add other factors – an outdated infrastructure, no visibility into your network, increased compliance requirements, business relocation or BYOD implementation – and it becomes even more complex.

Sentia's Secure Managed Network offers you a fully managed solution with built in security allowing your entire network (firewall, wireless, switching) to work together to protect IT resources and achieve optimal performance.

Specifically designed for your business

Our network experts will customize a solution to suit your unique requirements – unified security management, high performance/high capacity wireless access, customizable usage policies, detailed usage reporting – and more.

Solution highlights:

- Fully managed and secure
- 100% fully managed, Sentia handles it all for a low monthly fee.
- High network visibility
- Stay informed with our comprehensive reporting on network security, usage and compliance.
- Affordable, reliable, resilient
- Free up valuable IT staff to focus on your core business while Sentia keeps your network optimized and secure.
- Experts at your service
- Our Canadian staff is available 24/7/365

Sentia simplifies and secures your network

Our fully managed solution ensures ultimate security, scalability and flexibility to adapt to changing business needs, and provides deep insight into network usage.

- **Comprehensive security control**
Entire network (firewall, wireless, switching) works together to protect IT resources
- **Proactive 24/7 network management**
Reduce business risk by relying on experienced and certified experts to achieve maximum network efficiency and uptime
- **Flexible to grow with your business**
Modular nature of solution allows your business to grow within existing sites or add new sites while experiencing the same great capabilities
- **Secure remote access**
Ensure all devices have authorized access to network and confidential data
- **PCI compliant infrastructure**
Secure data hosting for credit card payments, and store, process and transmit cardholder data
- **SD WAN**
Do away with costly leased lines. Improve bandwidth and network performance for less
- **High performance 802.11ac Wave 2 wireless network**
Do away with costly workstation cables
- **Extensive reporting capabilities**
Gain insight with detailed monthly usage reporting on network security, usage and compliance
- **Application usage and bandwidth control**
Save money on expensive Internet upgrades and improve employee productivity by restricting non-production apps; for example, games and video
- **Guest Wi-Fi captive portal**
Control access to your Wi-Fi network
- **Predictable IT spending**
Maximize your IT budget and control costs with a monthly subscription-based model

Ask a Sentia security architect for more details.

- Two-factor authentication
- Deep packet inspection
- Redundant WAN services over Internet VPN
- Client anti-virus management
- Customer engagement applications and analytics
- Mobile Device Management

Optimized and affordable

Save time, resources and money by leveraging Sentia’s advanced technical capabilities and vendor relationships to deliver a true return on investment and economies of scale.

Our experts will scope and design a secure managed network solution to meet your particular business needs. The following pricing is a general guideline.

Business Scenario	Small Business	Small Business Plus	Medium Business	Large Business
Square footage	<5000	<10000	~20000	<40000
Users	<10	<30	~100	250
Switchports	<10	<24	<96	<192
Internet Speed	<100 Mbps	<100 Mbps	200 Mbps	500 Mbps
Monthly Rate (starting from)	\$ 325.00	\$ 550.00	\$ 1,050.00	\$ 2,100.00

Pricing Notes:

- Cabling for access points included
- Assume single wiring closet– multiple wiring closets require custom pricing
- Internet service not included
- Premise cabling not included
- Rack and UPS not included
- Access point installation at office ceiling height only, industrial and warehouse settings require site walk thru and installation validation
- Initial set-up fee applies (\$2-5K)
